

Polar[®] Focus

Project Profile

Installer: McClelland Sound

1 Danley Sound Labs JH-20 Jericho Horn

Total Cluster Weight: 720 lbs.

Products used: Polar Focus Custom Bracket

Dodge City Memorial Stadium

McClelland Sound contacted us for a custom bracket with full tilt control for the amazing 720 pound Danley Sound Labs, Inc. JH-90 speaker. The Danley JH-90 “Jericho Horn” has six 18” drivers, six 6” midrange drivers and three coaxial high frequency drivers with 1.4” exits coupled to Danley’s patented layered high frequency combiner.

Once mounted to the top of this W10x49 column, the speaker has full pan and tilt control and can be locked into position.
