2 Bose RMS 218 Subwoofers

Total cluster weight: 696 lbs. each
Products used: Stingray Frame for Bose RoomMatch

Project Profile

Southland Baptist Temple

Polar Focus assisted Lowrance Sound Company with this installation of Bose RoomMatch clusters at Southland Baptist Temple in Paducah, Kentucky.

Southland Baptist Temple contacted Mark Lowrance of Lowrance Sound Company, Inc. of Union City, Tennessee to upgrade their sound system. Mark utilized a design with Bose Professional RoomMatch line array modules in a left and right configuration, along with a downfiring RMS-123 model subwoofer on each side.

Carl Lowrance from Lowrance Sound had this to say about working with us:

"In the AV industry, there are factors that matter more than anything: professionalism, integrity, and experience. I cannot say enough good things about Polar Focus. For decades we have relied on them for custom products and support, never once having let us down, but always exceeding our expectations. I would recommend them to any and everyone, they are that good!"

Additional speakers from Bose were used as choir fills. Mark chose Polar Focus for our family of wood beam brackets for super clean installation. Polar Focus also supplied an aftermarket line array frame for the Bose RoomMatch with integral tilt control and a full range of accessories. Using a Custom Beam Attachment to connect to the wood beams with a structural extension post that was also a cable raceway resulted in a very clean and safe installation.

The team at Lowrance Sound specializes in high quality sound systems installed well.
