

# Polar<sup>®</sup> Focus

## Project Profile

### Baxter Arena, University of Nebraska

We'd like to share this recent installation of Polar Focus rigging for 12 EAW QX speaker clusters at Baxter Arena at the University of Nebraska, Omaha.

A total of 38 EAW QX loudspeakers were installed at the shiny new Baxter Arena. Polar Focus provided the complete transition between the roof structure and the EAW QX Series loudspeakers. There are a total of 24 QX-300 series, 4 QX-500 series, and 10 QX-118 Subwoofers. Polar Focus also supplied PE stamped drawings for the state of Nebraska.

The system was designed to allow for sightlines and easy rigging for rock concerts. Hockey fans at UNO will be enjoying this new sound system for years to come. Go Mavericks!

### Installer: Electronic Sound

12 clusters consisting of:  
24 EAW QX-300 series  
4 EAW QX-500 series
