

Polar[®] Focus

Installer: IES Communications

10 clusters, each with:

3 Bose RoomMatch Line Arrays

Total Cluster Weight: 642 lbs. each

Products used: Stingray Frame for Bose RoomMatch

Project Profile

Virginia Military Institute

Jim had great things to say about how much easier Polar Focus rigging made the installation process:

"We got it all done, and even had to take down the last 3 and redo because they put the wrong cabinets on the clusters. The more we did the faster we got. Imagine that!"

"They went up really easy once we got past the construction issues."

Virginia Military Institute in Lexington, VA has ten beautiful new Bose RoomMatch clusters installed by Jim Hogan of IES Communications.

Polar Focus supplied our Stingray Frame for Bose RoomMatch, as well as our quick pin line array rigging accessories, including the Spine Frame Adapter, which allows infinitely adjustable tilt control under full load. Every cluster is easily adjustable in both pan and tilt under full load.

This project came in as a rush and Polar Focus was able to manufacture the white hardware within the installation timeline. The white rigging makes the speakers appear to float on air, it is practically invisible.
